

**Title: Functional Analysis Methodology: What it is and why we should do it**

**Credits: 1.0 Type-2 Credits**

**Presenter: Sharlene Corrigan, MA, BCBA**

This workshop covers a brief history of functional assessment, including Federal legislation and the development of function-based assessment and treatment. IDEA is discussed and the importance of identifying function prior to developing behavior intervention plans.

Learning objectives: Participants will...

- Be able to identify and describe IDEA and the underpinnings of functional assessment
- Identify the origins of function-based methodologies
- Describe indirect, descriptive, and experimental methods of functional assessment
- Identify when the different methods are used
- Identify treatment options, based on functional assessment results
